

# MEMOFOAM

Foam made by memory latex, designed for footbed.

The **cushion controlled**, also called "shape memory" enabling to exercise an equal elastic thrust on the whole foot surface. During the use of the shoe, the insole is molded taking the shape of the foot. This feature is conferred by the visco-elastic latex used for the memory foam. The **breathability** is ensured by the typical open cell structure of the latex, which also allows the **absorption** of moisture of the skin and subsequent desorption.

*cushion control*  
*breathable*  
*absorbent*

10 % Polyester  
90 % Latex

TEST	UNITS	STANDARD	TYPICAL VALUES
